

Unit 4 Overview

Partners, Problem Drawings, and Tens

UNIT 4 REVIEWS AND BUILDS on children's understanding of addition and subtraction story problems. Children deepen their knowledge of problem solving as they learn the reverse connection of creating story problems for addition and subtraction numeric equations they have solved. In other activities throughout the unit, children continue partner work for partners 2 through 6 and practice visualizing teen numbers as a ten and extra ones. Geometry concepts are extended as children make 2-dimensional patterns on triangular grids.
