

**How to make:** Title the bulletin board “Catch of the Day.” Make ten fishnets, as shown, from string and construction paper. Label each handle with one phonetic symbol from Units 1–5. Staple the nets to the bulletin board. For each unit, cut out twelve fish from brightly colored construction paper, and write a Basic Word on each fish. Cover a shoe box with blue paper, label it *Fish Pond*, and staple it to the bottom of the bulletin board. Place a box of thumbtacks or pins nearby.

**How to use:** As you work on each unit, “stock” the fish pond with the appropriate fish. Have students “catch” a fish from the pond and secure it in the net whose phonetic symbol matches the word’s vowel sound. You may wish to accumulate the spelling-word fish on the board as students work through each unit in the cycle.
