

Spelling Game

Remember That Word!

Players: whole class

You need: chalkboard, chalk

How to play: Make a list of Unit 29 spelling words on the board in random order. Choose one child to be the leader.

1. Read the list words aloud one at a time as the leader points to them. Children then study the words for one minute.
2. Children close their eyes. The leader erases one word from the list.
3. Players open their eyes and look at the word list. A volunteer comes to the board and writes the missing word where it belongs. Other players say whether the word has been spelled correctly.
4. Continue erasing words and rewriting them until all of the words on the list have been spelled correctly.

Other ways to play this game: For small-group play, write the words on index cards. A leader arranges the words in rows for other members of the group to study. The leader then turns over one card while the other players close their eyes. Players identify the missing word, spell it, and turn the card over to check their spelling.
