

Spelling Game

Ready, Set, Search

Players: 2 or more

You need: list of Unit 4 Basic Words for each player, pencils, graph paper, timer (optional)

How to play: Each player creates a word search puzzle based on Basic Words. Players swap puzzles and solve them.

1. Take a sheet of graph paper and outline a box with 15 squares across and 15 squares down. This forms the border of the word search puzzle.
2. Write Basic Words on the grid, one letter per square. Words can run across, up or down, or diagonally. They can intersect where they share letters. After putting all the Basic Words in place, fill in the blank squares with random letters.
3. Swap puzzles with another player. Find and circle the Basic Words, checking each word off the list until all have been found.

Other ways to play this game: Make the game harder by setting a time limit. See who finds the most words during the set time.
