

# Spelling Game

## Homophone Rummy

**Players:** 2 players plus a checker

**You need:** 20 cards, with a Basic Word from Unit 9 written on each one; pencils; paper

**How to play:** Players match and spell homophone pairs.

1. Players quickly read over the list of Basic Words. The checker then keeps the list. The cards are shuffled and turned over in a pile, face down. The first player picks the top card. He or she then draws a picture clue for the word's *matching* homophone on a separate piece of paper.
2. The second player looks at the first player's drawing, guesses the word, and spells it.
3. The checker makes sure the right word was spelled correctly. The player who guesses the matching homophone gets one point and another point if the word is spelled correctly. Then the other player takes a turn.
4. After a drawing of each Basic Word has been completed, the game ends. The player with the most points wins.
