

**Spelling
Game****Artful Clues**

Players: 2 or more

You need: 20 word cards with one Unit 22 Basic Word on each card, modeling clay, paper, pencil, markers

How to play: Players guess words from clues given by other players.

- Players take turns choosing a word card without showing it to the other players. When it is a player's turn, the player may choose one of three ways to give a clue for the word. The player may draw a picture clue, mold a clue with the clay, or use pantomime and gestures to give a clue.
- The first player to guess the word must spell it correctly. If that player spells the word correctly, he or she and the player who gave the clue both receive a point. The player who guessed the word correctly chooses the next word card. Play continues until all the words have been guessed and spelled correctly.
