

# Spelling Game

## Winner Takes All

**Players:** 2

**You need:** 20 index cards, a list of Unit 7 Basic Words, timer

**How to play:** Players compete to spell words and collect the greater number of cards.

- Select a time limit, such as six minutes. The players shuffle the cards and deal ten cards to each player. They each place their cards in a pile, face down.
- Play begins as both players simultaneously put the first card in their pile face up between them. They take turns covering their own card by placing one hand over it and asking the other player to spell the word.
- If one player makes a spelling error, the other player gets both cards. If both players make a spelling error, each takes back his or her own card. If both players spell the words correctly, the player whose word comes first in alphabetical order wins both cards.
- The game ends when time is called or when one player has all the cards. The player with the greater number of cards wins the game.
