

# Spelling Game

## Search Party

**Players:** 2

**You need:** Unit 8 Basic Word list, graph paper, pencils

**How to play:** Students create and solve word search puzzles.

- Each player chooses eight or more words from the Basic Word list and makes a word search grid that includes the words. The grid should be at least ten squares by ten squares; it can be larger. Basic Words can be written horizontally, vertically, and diagonally in the grid. Random letters fill out the rest of the grid.
- After completing their puzzles, players exchange them. They find and circle the Basic Words on the grid.
