# Make a Stream

## Steps

- 1. Use Models** Use clay to make a stream in a pan. Then make the banks of the stream with more clay.
- 2.** Put rocks and pebbles in the bottom of the stream.
- 3. Observe** Pour water in one end of the stream. Watch the water flow.
- 4.** Write about what happened.

---

---

---

---

Name \_\_\_\_\_

## Think and Share

1. **Communicate** Tell a classmate about the nonliving parts of the stream.

---

---

2. **Infer** How might living things meet their needs in a stream habitat?

---

---

---

### Experiment

Plan ways to change how the water moves in your model. **Observe** what happens each time.
