

Name _____

Grow Plants

Steps

1. Spray water on the paper towels. Fill each cup with paper towels.
2. Add seeds to each cup.
3. **Predict** Put the **winter** cup in a cold place. Put the **spring** cup in a warm place. Tell what you think will happen.

4. **Communicate** Look at the seeds after five days. Write about how they have changed.

Name _____

Think and Share

1. What helped the seeds grow?

2. **Infer** Do plants grow better in winter or in spring?

Experiment

Guided Inquiry

Put the sprouted seeds in soil.

Make a plan for caring for the plants.

Observe the plants for one month.
