

Name _____

Fall Weather

Steps

1. Look at the temperature chart. Write the season names in order on the bottom of the bar graph.
2. **Record Data** Color a bar to show the temperature in winter. Then color a bar for each other season.
3. **Compare** the temperatures in these four seasons.

Think and Share

1. **Use Data** Which season has the warmest weather?

Name _____

2. How does the temperature change from season to season?

Experiment

Record the temperature where you live at the beginning of each month.

Communicate what you find.

Guided Inquiry
