

Name _____

Find Solids

Steps

1. **Observe** List five objects that have shapes that do not change.

2. **Communicate** Choose one object. Use two clues such as **above the book** and **next to the ball** to tell how to find it.
3. Ask a partner to find the object.
4. Give clues for other objects.

Name _____

Think and Share

1. What are some words you used to tell where the objects were?

2. **Compare** How are solids alike and different?

Experiment

Guided Inquiry

Use a hand lens to **observe** a solid. Tell what you can see with the hand lens that you cannot see without it.
