# Making Sound

## Steps

1. **Work Together** Stretch a piece of wax paper over the opening of a jar. Have a partner use a rubber band to hold the wax paper in place.

**Safety:** Wear goggles!

2. Put paper pieces on the wax paper.

3. **Work Together** Gently tap the wax paper over the opening or pluck the rubber band. Talk with your partner about what you see and hear.

## Think and Share

1. **Infer** What caused the paper to move the way it did?

---

---

---

---

Name \_\_\_\_\_

**2. Predict** How could you cause the paper to move differently?

---

---

---

---

---

---

Guided Inquiry

**Experiment**

Can you make sound with only a jar and a rubber band? Make a plan. Write each step and test your plan. **Communicate** what you observed.
