

Dear Family,

Your child's science class is beginning a unit called "Looking at Earth." In this unit, children will learn about land, water, and air. They will learn about different kinds of land (mountains, valleys, deserts, plains) and different kinds of water (oceans, lakes, rivers). Children will learn about Earth's resources (soil, water, minerals, trees), and they will discuss ways for saving water and energy.

For this unit, we'll be using the materials listed below. Would you be willing to donate any of these items? If so, we'll need to receive them by _____.

- brown and blue clay
- plastic knives
- paper plates
- aluminum pans
- craft sticks

Do you or other family members have a special interest in earth science? Could you help with activities? If so, please fill out the form below and have your child return it to class.

Thanks for your help!
