

Dear Family,

Your child's science class is beginning a unit called "Weather and Seasons." In this unit, children will learn about the different kinds of weather and tools used to describe weather. They will investigate winter weather, spring weather, summer weather, and fall weather. Children will discover how a thermometer, windsock, and rain gauge works.

For this unit, we'll be using the materials listed below. Would you be willing to donate any of these items? If so, we'll need to receive them by _____.

- straws
- self-seal plastic bags
- paper towels
- spray bottles
- lima bean seeds
- plastic salad containers with lids
- washcloths
- thermometers
- shoe boxes

Do you or other family members have a special interest in weather and the seasons? Could you help with activities? If so, please fill out the form below and have your child return it to class.

Thanks for your help!
