

Observe a Tree

Steps

- 1. Observe** Go outside. Use a hand lens to look closely at the parts of a tree.
- 2. Record Data** Make a list of living things you find. Then draw a tree in the space below. Show the living things that you found.

- 3. Communicate** Talk about your drawing with a partner. Find out if you saw different things.

Name _____

Think and Share

1. What did you find on and under the tree?

2. Infer How do trees help the living things you saw?

Investigate More!

Work Together Work with a partner. Talk about what should be in a forest. Choose the best ideas. Then make a model of a forest in a shoebox.
