

Water Changes

Steps

- 1. Measure** Put the same amount of water into each cup. Cover one cup.
- 2. Mark** the water level on each cup.
- 3. Predict** Put the cups in a sunny place. Tell how the water might change.
- 4. Observe** Look at the cups every day for a week. On a sheet of paper, record what you see.

Think and Share

- 1. Compare** How did the water change in each cup?

Name _____

2. Infer Why do you think the water changed?
