

# Grow Plants

## Steps

1. Spray water on the paper towels. Fill each cup with paper towels.
  2. Add seeds to each cup.
  3. **Predict** Put the winter cup in a cold place. Put the **spring** cup in a warm place. Tell what you think will happen.
- 

4. **Communicate** Look at the seeds after five days. Talk about how they have changed.

## Think and Share

1. What helped the seeds grow?
- 
-

Name \_\_\_\_\_

## 2. Infer What happens to seeds in cold weather?

---

---

### Investigate More!

**Experiment** Put the sprouted seeds in soil. Make a plan for caring for the plants. Write your plan here. Follow your plan. Observe the plants for one month.
