

Sun Changes

Steps

1. Observe Go outdoors in the morning.

Find where the Sun is in the sky.

Safety: Do not look right at the Sun!

2. Record Data Use the chart below to show where the Sun is. Go out at noon. Record what you find.

	First Recording	Second Recording	Third Recording
Time			
Position of Sun			

3. Predict Look at your data. Predict where the Sun will be next. Check your prediction.

Name _____

Think and Share

1. What did you observe about the Sun?

2. How did your prediction compare to what happened?

Investigate More!

Experiment Make a plan to observe how the Sun changes shadows during the day. Talk with the class about what you learn.
