

Float or Sink

Steps

1. Pour water into a tub.
2. **Predict** Choose an object. Decide if it will float or sink. Write your prediction in the chart.

Object	Prediction	Observation

3. **Observe** Put the object in water. Watch what happens.
4. **Record Data** Write what happened. Test other objects.

Name _____

Think and Share

1. Compare your prediction with what you observed. Were they the same?

2. Infer What is the same about the objects that floated?

Investigate More!

Experiment Take a ball of clay.
Change its shape to make it float.
Draw the shape you made.
