

Name _____

Predict Changes

Steps

1. Put one bag of ice in a bowl of cold water. Put the other bag of ice in a bowl of warm water.

2. **Predict** Record what you think will happen to the ice in each bowl.

3. **Observe** Wait five minutes. Record how the ice cubes changed.

Name _____

Think and Share

1. Communicate Tell others how the ice changed. Write your description here.

2. Infer Why did the bags of ice change in different ways?

Investigate More!

Experiment How can you make the water change back into a solid?

Think of a plan for finding an answer. Then test your plan.
