

# Grow a Plant

## Steps

1. Choose one kind of a seed. Look at the picture on the packet. Plant several seeds in soil. Water as needed. **Safety:** Wear goggles!
2. **Observe** Observe your plants every day. Draw them in the space below.

3. **Measure** Use a ruler to measure how tall the plants are. Record the height next to each drawing.

## Think and Share

1. How did the plants change after one week?

---

---

2. **Compare** After two weeks, how are your plants the same as the plant pictured on the seed packet? How are they different?

---

---

---

---

## Investigate More!

**Experiment** Mix different kinds of seeds in a cup. Then plant the seeds. Guess what kind of plant each seed will grow to be. Observe how they grow.
