

# Living or Nonliving

## Steps

- 1. Observe** Find a small rock or log. Look under it.  
Look around it.
- 2. Classify** Look up close. Decide whether each thing you see is living or nonliving.
- 3. Record Data** Draw each thing you see in the correct place on the chart below.

Living	Nonliving

- 4. Communicate** Show your chart to others. Talk about what you observed.

## Think and Share

1. Where did you see more living things? Tell why.

---

---

---

---

2. **Compare** How are the nonliving things alike?

---

---

---

## Investigate More!

**Ask Questions** Make a list of questions about the living things that you observed. Think of ways to find answers to your questions.
