

# Make Imprints

## Steps

1. Flatten some dough on a plate.
2. **Use Models** Choose two objects. Press each object into the dough to make an imprint.
3. **Infer** Trade plates with a classmate. Infer which object was used to make each imprint.

## Think and Share

1. **Communicate** Tell what clues helped you decide which object made each imprint.

2. What can you learn about an object by looking at only an imprint?

---

---

---

### Investigate More!

**Work Together** Look for imprints near your school. Share ideas about what made the imprints.
