

Make a Pinwheel

Steps

1. Cut along the solid lines of the pinwheel pattern. Then cut along the dashed lines stopping at the center circle. **Safety:** Scissors and pushpins are sharp!
2. Put a pushpin through the four dots and the center circle. Then put it into the eraser of a pencil.
3. **Observe** Blow lightly on the pinwheel. Then blow hard on it. Observe what happens.

Think and Share

1. **Infer** What made the pinwheel spin?

Name _____

2. How did the pinwheel move differently each time you blew? Tell why.

Investigate More!

Experiment Plan and try other ways to make the pinwheel spin. Observe how fast it spins each time. Share your results.
