

Look for Pollution

Steps

1. Place a funnel in each jar, and then put a filter in each funnel.
2. **Use Models** Put a spoonful of soil A in jar A. Put a spoonful of soil B in jar B. The jars are environments. **Safety:** Wear goggles!
3. **Compare** Pour some water into the soil in each jar. The water is rain. Tell how each environment changes.

Think and Share

1. **Communicate** Which soil do you think might be polluted? Tell why.

Name _____

2. Infer Can soil pollution always be seen? How do you know?

Investigate More!

Experiment Predict what will happen if you pour colored water into the soil in jar B. Try it. Tell about your results.
