

# Observe Objects

## Steps

1. **Observe** Choose an object to observe. In the space below, write or draw what you see.

2. **Observe** Look at the same object with a hand lens. In the space below, write or draw what you see.

3. **Communicate** Show your drawings to a partner. Talk about what you saw.

4. Choose another object. Repeat the activity.

## Think and Share

1. What does the hand lens do?

---

---

2. **Compare** How is what you see with the hand lens different from what you see without the hand lens?

---

---

## Investigate More!

**Be an Inventor** A hand lens can make a task easier. Think of a task that you do at home or at school. Invent a way to use a hand lens to make the job easier.
