

Classify Objects

Steps

- 1. Predict** Decide if a magnet might attract each object. Record your predictions in the chart below.

Testing Objects		
Object	Prediction	What Happened

- 2. Observe** Hold the magnet near each object. Observe and record what happens.

- 3. Classify** Sort the objects into two groups called **Attracted** and **Did Not Attract**. Write your groups here.

Attracted	Did Not Attract

Think and Share

- 1. Infer** What kinds of objects do magnets attract?

- 2.** What are some clues you used to make your predictions? Tell why.
