

# How Do Rock and Soil Change?

## Cause and Effect

### Cause

1. Water moves across rocks in a stream.
2. Waves crash on an ocean shore.
3. Roots grow in the cracks of a rock.
4. Strong gusts of wind blow.

### Effect

1. The edges of the rocks become \_\_\_\_\_.
2. Some land is pulled \_\_\_\_\_ from the shore.
3. The rock splits into \_\_\_\_\_ pieces.
4. Sandy soil is \_\_\_\_\_ to new places.
