

Observe Objects

Steps

- 1. Observe** Choose an object to observe. In the space below, write or draw what you see.

- 2. Observe** Look at the same object with a hand lens. In the space below, write or draw what you see.

- 3. Communicate** Show your drawings to a partner. Talk about what you saw.

- 4. Choose another object.** Repeat steps 1 and 2.

Name _____

Think and Share

1. What does the hand lens do?

2. **Compare** How is what you see with the hand lens different from what you see without the hand lens?

Be an Inventor A hand lens can make a task easier. Think of a task that you do at home or at school. Invent a way to use a hand lens to make the job easier.
