

Compare Life Cycles

Steps

- 1. Observe** Look at the animal pictures. Name the animals.
- 2. Classify** Think about how the animal pictures are alike and different. Sort the pictures. Make a group for each kind of animal.
- 3. Order** each group. Put the baby first and the adult animal last.
- 4. Record Data** Choose one group. Use the pictures to write about or draw the life cycle of that animal.

Think and Share

1. **Compare** How are the baby and adult in each group alike?

2. How do some animals change from babies to adults?

Ask Questions

Guided Inquiry

Write three questions about how animals grow and change. Work together with classmates to find the answers.
