

How Does the Moon Move?

Cause and Effect

Cause

1. Light from the

reflects off one side
of the Moon at a
time.

2. The Moon

around Earth.

3. It takes about one

for the Moon to go
around Earth.

Effect

1. On

_____,
we may see only a
part of the Moon's
lighted side.

2. The Moon
looks a little

every night.

3. These different looks
are called

and they repeat
every four weeks.
