

Vocabulary

control Anything that is kept the same in an experiment.

In a fair experiment, you keep everything the same except the variable you are testing.

experiment An investigation that tests an idea.

In a fair experiment, only one thing is changed. Everything else stays the same.

seed Something a plant makes that can grow into a new plant.

A seed has a young plant, a supply of food for it, and a coat to protect it.

variable Any factor that can change in an experiment.

In a fair experiment, only one variable is tested at a time.
