

Spinners

- 1 Cut out each spinner. Cut only along the solid lines.
- 2 Fold on the dotted lines. Fold in along lines 1 and 2. Fold up along line 3. Fold blade A in one direction and blade B in the opposite direction.
- 3 Hold each spinner high and drop it. Compare their flights.
- 4 Redesign your spinners. Try to make them spin faster, fall slower, or spin the other way. Fold them a different way, attach paper clips to the bottom, or cut a new spinner with longer or shorter blades or body.
