

Section 1 Assessment

1 What Measures Rain?

2 What Helps Water Evaporate?

3 My Rain Cloud Makes Rain

My cloud made this much rain: _____ inches

Directions: 1. Have students circle the tool that measures rain. 2. Have students circle the puddle that will evaporate faster. 3. Have students wet the “cloud” (sponge) with the dropper, then make it “rain” into the “rain gauge” (empty cup). Have them measure rain and write their measurements to the nearest inch.
