

# What Helps Mold Grow?,

## Page 1

- 1** Get out three pieces of bread. Use sandwich bread or other sliced bread.
- 2** Use a spray bottle and lightly squirt each piece of bread one time. Do not get the bread soggy.
- 3** Put each piece of bread into a separate plastic bag. Zip all three bags shut.
- 4** Circle your predictions on the next page.
- 5** Place one bag in a place that gets plenty of light.
- 6** Place the second bag in a warm, dark place, like a closet.
- 7** Place the third bag in the refrigerator.
- 8** Wait one week. Then look at the bread in each bag. Answer the rest of the questions on the next page.

# What Helps Mold Grow?,

Page 2
