

Writing a Lab Report

Use this outline to write a report of your science experiment.

Science Experiment

Question

Hypothesis

Procedures

Variables

- **Controlled variables** (things kept the same)
- **Independent variable** (the one thing you changed in the experiment)
- **Dependent variable** (experiment results)

Data and Results

- **What happened?**
- **Make a chart or graph showing your results.**

Conclusions

- **What did you learn?**
- **Do you need more information to support your conclusion?**
- **Draw the experiment.**
