

Section 9 Assessment

Vocabulary

- 1 What forms when two or more substances are put together and each substance still looks like it did before? Circle your answer.

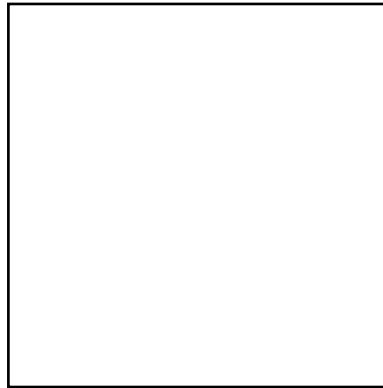

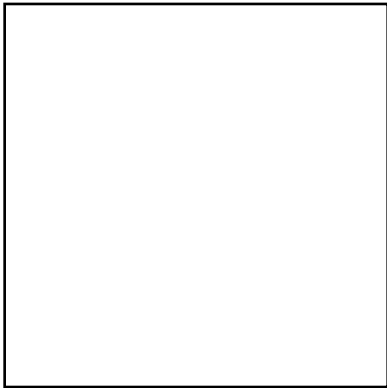

a mixture

a solution

a crystal

Growing Crystals

- 2 Draw a crystal of alum that was formed slowly and one that was formed quickly. Label each.

Making a Solution

Pour water into each of the three other cups at your station. Stir each with a spoon.

- 3 Which substances formed a solution with water?

- 4 How could you make the substances dissolve faster?
