

Graphing Static Charge

Use data from your *Measuring Static Charge* Resource Page to make your bar graph.

- ➊ Begin your graph by adding the missing numbers to the scale at the left.
- ➋ List the materials you tested on the lines across the bottom. Wool has been done for you.
- ➌ Use your data to decide how tall to make the Wool bar. Draw a line across the column to mark this height. Shade the column up to the line.
- ➍ Repeat Step 3 for the other materials you tested.
