

Section 7 Assessment

Vocabulary

Write the vocabulary term that best matches each definition on the line provided.

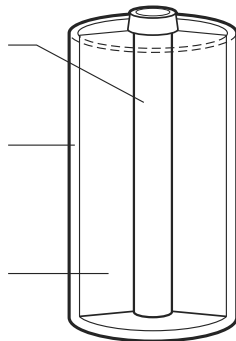

- ① unit used to measure small amounts of electric current

- ② device that changes chemical energy to electrical energy

- ③ device that converts motion into electrical energy

Parts of a Battery

- ④ Label the parts of the battery shown using these terms:

carbon rod,
zinc case,
electrolyte

- ⑤ From which part of the battery do electrons leave to create electric current?

Voltaic Pile

- ⑥ Look at the voltaic pile at your station. Draw the pile on the back of this sheet. Then label the electrodes and electrolyte in the pile.
