

Research and Development

Date _____

Student Inventor _____
(Last name) (First name)

Answer each of the following questions briefly to provide a short overall description of the research and development work done on your invention. Use additional pages if necessary. Be sure your answers are readable.

1. What did I read that helped me with my invention?

2. Who did I talk to about solving problems and planning properly?

3. What materials did I use?

4. How did I control the cost of my invention?

5. What steps did I follow; what problems did I have to overcome?

6. How did I test my invention or process?
