

# Family Newsletter for Unit 3

## Where We Live

### The Big Idea

#### Why is the world around you important in your life?

- **Content Standard 3.0** Geography enables the student to see, understand, and appreciate the relationships between people, places, and environments. The student will use the knowledge, skills, and understanding of concepts within the six essential elements of geography: world in spatial terms, places and regions, physical systems, human systems, environment and society, and the use of geography.

#### Learn About It

In this unit your child will learn:

- about water and land on Earth
- about our country and state
- about natural resources and how people use land
- about weather and seasons

Here is one way you can help your child learn:

#### Family Activity

**Favorite Season Poster** What is your family's favorite season? Together with your child, make a poster that shows activities your family enjoys during that time of year. Make sure your child includes details showing appropriate weather and clothing for the season.
