

# Family Newsletter for Unit 3

## Our World

### The Big Idea

#### What do you know about Earth and its people?

- **Content Standard 3.0** Geography enables the student to see, understand, and appreciate the web of relationships between people, places, and environments. The student will use the knowledge, skills, and understanding of concepts within the six essential elements of geography: world in spatial terms, places and regions, physical systems, human systems, environment and society, and the use of geography.

### Learn About It

In this unit your child will learn:

- what their address stands for
- about different kinds of communities and regions
- about different shapes and forms of land and water
- about weather, climate, and resources

Here is one way you can help your child learn:

### Family Activity

**Create an Address Book** Do you have family members or friends who live in other states or countries? With your child, make a list of family members and friends. Put the list in alphabetical order. Then write all the names and addresses on separate sheets of paper. Staple the paper together and help your child illustrate a cover for the address book.

**Technology** Check out
