Zeros in the Product

To solve Problems 1 and 2, use the Maryland sales tax of 5%.

1. The cost of a candy bar is $0.89. How much sales tax will be charged on the candy bar? Hint: Remember to add a zero if necessary.

2. Paul's Pizza is having a sale on Mozza-Melts. Each order of Mozza-Melts costs $0.99. Including tax, how much will a customer pay for one order of Mozza-Melts?

To solve Problems 3 and 4, use the California sales tax of 6%

3. Chris bought 17 pieces of candy for $0.05 each. Including tax, how much did Chris pay for the candy?

4. Ken bought 15 pencils for $0.12 each. What was the total amount of money Ken paid for the pencils?

To solve Problems 5 and 6, use the Puerto Rico sales tax of 5.5% for all items purchased, and add on another 15% for personal items.

5. Kim and Erica went on vacation in Puerto Rico. While there, Kim bought a straw hat for $1.49 at a market. Including tax, how much did Kim pay for the hat?

6. Erica chose to buy a braided bracelet for $1.79 at the market. What was Erica’s total cost for the bracelet?
