Hands On: Draw Views of Solid Figures

Solve problems 1–6.

1. What is the front view of this figure?

2. What is the top view of this figure?

3. Draw the front, top, right side, and left side view of the figure.

4. Draw a three-dimensional figure using these views.

5. Combine the two figures below. Then draw a front, top, and side view of your new figure.

6. Mr. Donald built a staircase that measured 3 cubic units wide and has a height of 5 cubic units. Draw a sketch of the staircase.
