Keep On Counting

Count on to add.

1. 7 + 2 = 3

2. 6 + 2 = 3

3. 4 + 2 = 3

4. 5 + 2 = 3

5. 3 + 2 = 3

6. 2 + 2 = 3

Explain Your Thinking  When you use counting on to find the sum of 2 + 5, does it matter which number you start with? Why?
