Problem-Solving Decision: Too Much or Too Little Information

Read the paragraph.

When you **weigh** something, you are finding out how heavy it is. The **weight** of something is a number that tells you how much something **weighs**. You can measure the weight of something in ounces or pounds.

Fill in each blank with a word from the box.

| weigh | weighs | weight |

1. Ounces and pounds are used to measure ________________.

2. Do you know how much that watermelon ________________?

3. Those boxes each ________________ 100 pounds.

Underline the correct answer.

4. Did Dr. Lin (weigh, weighs) the baby?

5. By exercising every week and eating healthy meals, Richard lost a lot of (weigh, weight).

6. Lola’s cat (weighs, weight) 15 pounds.
