Can these five figures be arranged to form a figure that is congruent to the large triangle at the right?

You can make models and Act it Out to solve the problem. Trace the 5 figures and cut them out. Try to make the large triangle.

**The figures can be arranged to form a figure that is congruent to the large triangle at the right.**

1. Use two of the figures above to form a figure congruent to the triangle shown below. Make a drawing to show your work.

2. Can 5 toothpicks be used to form 2 congruent triangles? Make a drawing to show your answer.
