Cups, Pints, Quarts, and Gallons

Use units such as cups, pints, quarts, and gallons to measure how much a container can hold.

2 cups = 1 pint
2 pints = 1 quart
4 quarts = 1 gallon

Use cup, pint, quart, and gallon containers. Find out which amount is greater. Circle it.

1. 1 pint  3 cups
2. 1 gallon  7 pints
3. 5 quarts  1 gallon
4. 2 quarts  3 pints

Write the number that makes each sentence true.

5. _____ cups = 3 pints
6. 2 quarts = _____ pints
