Problem-Solving Decision: Multistep Problems

Try These!

1. Kaya pasted 3 rows of photos on each of 5 pages of her scrapbook. She put 2 photos in each row. How many photos are in Kaya’s scrapbook?  
   
   Show your work.

2. Cora has 4 party invitations in her scrapbook. Dan has 3 times as many party invitations as Cora. How many more party invitations does Dan have than Cora?

3. John’s vacation scrapbook has 2 times as many pages as his school scrapbook. There are 6 pages in John’s school scrapbook. How many pages are in both of John’s scrapbooks combined?

4. Lisa bought 3 scrapbooks for $3 each. She gave the sales clerk $10. How much change should Lisa get?

5. Members of the Scrapbook Club meet 2 days a week for 2 hours each day. How many hours will they meet in 6 weeks?
